+1 (774)-525-6102 | vijayvenkateshj012@gmail.com | [LinkedIn](#) | NJ

PROFESSIONAL EXPERIENCE

Business Data Analyst, Princeton IT Services, Princeton, NJ.
Assistant System Engineer, Tata Consultancy Services, Kolkata.

May 2025 – Present
Aug 2022 – Nov 2023

EDUCATION

Master of Science in Business Analytics - Clark University, Worcester, MA.
Bachelor of Engineering - Anna University, Chennai, TN.

2024 – 2025
2018 – 2022

PROJECTS

Product Label Comparison & Review Agent

- Designed an AI-powered product artwork review platform that automatically compares packaging versions and detects changes in ingredients, nutrition facts, allergen statements, certifications, serving information, and visual layout.
- Developed a reusable computer vision and OCR pipeline capable of processing packaging files without relying on hardcoded coordinates.
- Automated end-to-end review workflows by integrating AI agents with enterprise document management and cloud services.
- Generated client-ready PDF reports with annotated visual evidence, structured change summaries, and audit-ready findings.
- Built secure, production-ready processing workflows with authentication, background execution, logging, and robust error handling.

Microsoft 365 Governance Intelligence Platform

- Developed a centralized governance platform for Microsoft 365 security, SharePoint exposure, identity management, Copilot activity, and administrative operations.
- Built automated data ingestion workflows and executive dashboards for governance reporting and operational monitoring.
- Implemented role-based administration, job scheduling, and enterprise monitoring capabilities.

Regulatory Intelligence & AI Governance Agent

- Developed an enterprise AI solution that monitors regulatory websites, detects content changes, and maintains version-controlled regulatory intelligence.
- Built intelligent workflows for document comparison, change tracking, and AI governance.
- Implemented enterprise authentication, operational monitoring, and governance capabilities.

Outlook Calendar Intelligence Agent

- Developed a conversational AI assistant that enables natural language access to organizational Outlook calendar information.
- Implemented intelligent scheduling, meeting search, attendee analysis, and operational monitoring capabilities.

Business Document Review Agent

- Built AI-powered workflows for automated document review, information extraction, and structured report generation.
- Reduced manual review effort by generating business-friendly summaries and standardized outputs.

NYC Taxi Data Analysis

- Analyzed large-scale transportation datasets to identify operational trends, revenue insights, and rider behavior using advanced SQL.
- Produced stakeholder-focused analytical reports to support business decision-making.

Diabetes Patient Readmission Prediction

- Developed predictive machine learning models to identify patient readmission risk.
- Performed feature engineering, model evaluation, and healthcare data analysis to support clinical insights.

TECHNICAL SKILLS

Programming Languages - Python, SQL, Java, C, C++, R.

Data Analytics & Visualization - Power BI, Tableau, Excel, Pandas, NumPy, Matplotlib, scikit-learn.

Databases - PostgreSQL, MySQL, Oracle SQL, SQL Server, Snowflake, Power BI, Tableau, Excel

Cloud & Enterprise Technologies - Azure Function Apps, Data Factory, Storage, Blob Storage, Key Vault, Managed Identity, AWS

Artificial Intelligence & Automation - Copilot Studio, OpenCV, OCR, Computer Vision, Prompt Engineering, REST APIs, AI Agents, Workflow Automation, Power Automate.
